

Design a Coronation Throne

Design a throne for use by the new King
which includes modern technologies

Design brief

- The coronation of King Charles III will take place on Saturday 6 May 2023
- There will be a bank holiday on Monday 8 May
- Lots of public events will take place to celebrate this historic event

Your task:

- Design a throne for use by the new King that incorporates modern technologies

Design criteria

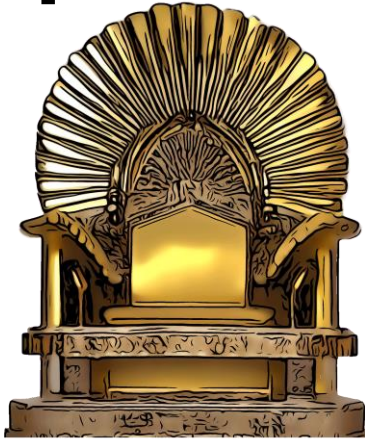

Design a throne for King Charles III that must:

- be suitable for the King to sit on comfortably
- include modern technologies
- be aesthetically appealing

Examples of thrones

Examples of modern technologies

Your design could include, for example:

- new materials such as carbon fibre and lightweight metals
- lighting, using colourful light emitting diodes (LEDs)
- Built-in speakers
- heating
- the ability to hover, using magnetic levitation, rockets or powerful fans
- wheels to let the throne drive around
- monitor screens and cameras
- robotic arms
- USB charging ports

Coronation Throne Design

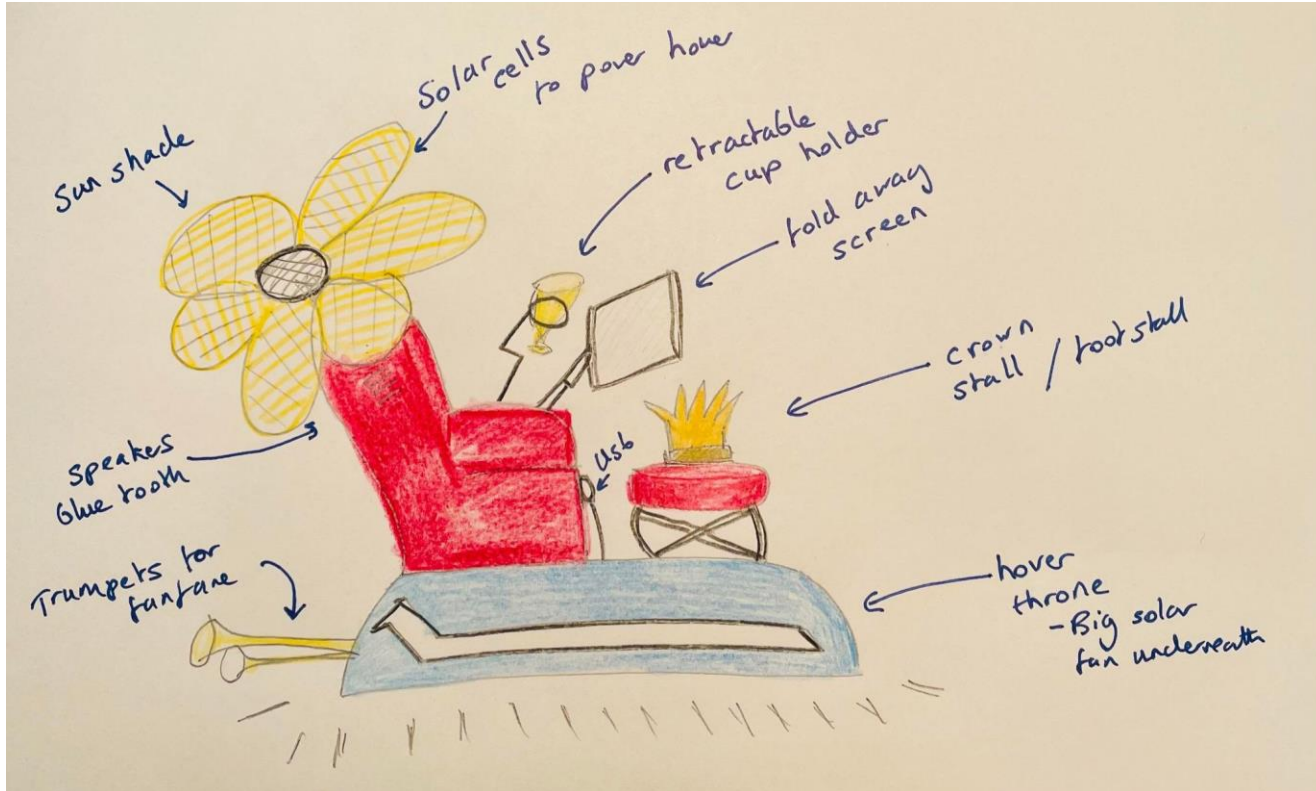

Use this space to sketch your idea for your new throne.
Don't forget to annotate your design to show how it meets the design criteria!

Notes about design:
